

About Us:

QTA Machining is a precision machine shop located in the heart of Buffalo, in close proximity to the I-190. The company currently has a wide array of CNC machines, employs 20+ employees, and operates in an ISO-9001:2015 certified quality environment.

The work we do varies in size and volume, from small parts (<1") to large (~35" OD), from prototypes to production runs, all at different levels of difficulty and tolerances.

CNC Machinery consist of Lathes, Mills (4-axis), EDM, OD/ID Grinder (see website for updated facilities list)

CNC Machinist Position:

- 7+ Years of related CNC Machining experience.
- Programming experience, desired but not necessary, with ability to make offsets, as needed.
- Proficient in machine setup (tooling, gauging, loading programs, work holding, etc).
- Comfortable working from automated setup sheets, instructions, and pre-established programs with minimal guidance.
- Complete understanding of blue print reading with the ability to work directly from them.
- Experienced working in an ISO 9001 quality environment, requiring high attention to processes and procedures.
- Ability to use basic measuring equipment (calipers, micrometers, gages, etc.) in-process at a minimum, along with experience using advanced measuring equipment (optical comparators, CMMs, etc), desired but not necessary.
- Time conscious, in a fast-paced environment, and willingness to ask for guidance, where needed, to meet deliverables and deadlines.
- Strong communication, team-oriented attitude, with a self-motivated desire to learn.
- Oversee and maintain a clean, orderly, and organized work area(s), along with ensure the proper routine maintenance of machinery and equipment.
